DROPPED BITS

Editorial by Steve Stroh N8GNJ

Well, it was short, but very sweet. As many of you already know, this will be the last issue of the Communicator that I will be editing. My wife Tina and I will be relocating to the Seattle Washington area, most likely in mid November. Quite simply, we were made an offer we couldn't refuse. When we investigated whether we could live and work in the area when we vacationed there in mid September, we absolutely fell head over heels in love with the area. A comment made recently by another newsletter editor who I admire has come to mind recently- Do what you have to do. Giving up the Communicator and North Coast is what I have to do, not what I want to do. I've greatly enjoyed my brief stint as Editor, and will miss the chance to try out some of the things I had planned for it.

I certainly hope someone is willing to pick up the Editorship of the Communicator other than Rick. Rick has too many responsibilities as of late, and his offer of handling the actual publishing chores is a very generous one, requiring the editor only to assemble the Communicator. I would hate to see the Communicator go the way of some other amateur club newsletters- one pagers, or newsletters put together by an editor that is obviously under duress.

The process of putting the Communicator together is a rather simple one (in my opinion) if you have access to an IBM PC type computer- the PC's large memory and reasonable amount of disk space make it relatively easy to assemble each issue with almost any PC word processing program. Although the three issues I have edited are on the large side because there was a lot of catching up to do from the summer, future issues shouldn't be all that large- 10 to 20 sides per issue. Most of each issue is submitted material- minutes, member articles, reprints, news of club activities, etc. So please, if you have the time, and the tools, and a desire to help the club continue to grow and prosper, please volunteer to edit the Communicator. It really isn't a bad job!

Since I am no longer Editor of the Communicator as of the completion of this issue, please send all submissions for future issues of the Communicator to the club's P.O. box- P.O. Box 30529, Cleveland, Ohio 44130.

MANY THANKS TO THOSE THAT HELPED AT THE 1987 GOLD CUP HOCKEY TOURNAMENT

Rick Wells K8SCI

The tournament started at 8:00 A.M. Friday, September 25th and ended the afternoon of Sunday, September 27. Although there were few volunteers to help with the event, causing very long periods of time for others, I would like to thank the following who volunteered their time and equipment: Ron K88BEB, Ken N8EIJ, Pauline KA8FOE, Paul N8HOB, Gene N8IUU, Karen KA8LIH, Glenn WD8OMW, Rick K8SCI, and Russ WB8UPA. Also to Ray KA8BPU who volunteered but then was not needed as the tournament schedule changed, eliminating his assigned position at that rink on Friday morning.

There were four calls made to Rescue Squads for injuries that occurred at the event as well as much coordination for the tournament was able to be accomplished through those that volunteered. The Winterhurst Hockey Association at the Winterhurst rink in Lakewood, and all of the Tournament personnel wish to express their great appreciation for the help that they received from the North Coast Amateur Radio Club.

LATEST 8TH DISTRICT CALLSIGNS

The callsigns for the 8th call district as of November 1, 1987 are as follows:

Novice: KB8DGH, Technician/General: N8IVJ, Advanced: KE8OA, Extra: NY8Q.

NCARC ARRL VE EXAM REPORT FOR OCTOBER 10, 1987

Dan Sarama KB8A

12 applicants took 23 elements passing 15 of them resulting in 8 upgrades, 1 code certificate, and 1 new novice. Congratulations to the following NCARC members who upgraded: Bob K8AAI from Advanced to Extra, Nick KB8BDY from Novice to Technician, and Warren KB8DEP from Novice to Technician.

Thanks to the following VE's who assisted me: Glenn AF8C, Bob W8IO, Mike K9SSL, Tim NR8T, and Fred WB8UDA, and to the following helpers: Mary Lou N8ILL and Rick K8SCI who volunteered their time and expertise to make these exams possible.

The next NCARC ARRL VE exam will be Saturday, December 12, 1987.

FOX HUNT REPORT FOR OCTOBER 10, 1987

Rick Wells K8SCI

The fox (Rick K8SCI) hid in the back of Pauline KA8FOE's Uncle's red pick-up truck under some sleeping bags in the cap. Running 5 watts into a 1/4 wave mag-mount antenna upside down (with black tape covering it) on the bottom of the truck's frame, he parked at the North Olmsted Police Station parking lot.

#1 hunter was Bob K8DTS and Amy in 27 minutes, #2 was Dave N8ETY in 62 minutes, #3 was Dan WD8AJF and Ann KA8ZEP at 73 minutes squeaking in about 10 seconds ahead of #4 Ted AA4KV and Bob K8AAI.

Bob will be the Fox for the next NCARC Fox-Hunt on November 14. Everyone is welcome to participate. All hunters meet at the rear of the North Olmsted branch of the Cuyahoga County Public Library (on Butternut Ridge Road). Be there early enough to set up any equipment necessary so that the hunt can start at 7:00 P.M.

VOLUNTEERING FOR PUBLIC SERVICE OR CLUB NEEDS

Rick Wells K8SCI

I am finding it quite disturbing that very few NCARC members are volunteering for the various Public Service events that occur throughout the year.

This is also true for the yet unfilled Meeting Program Chairman position, or for volunteers to help others in existing positions.

After the program at the October meeting (Chuck K8RSH discussing 10-10 International), everyone seemed to disappear within a few minutes leaving all the clean up duties with myself and my son Gene N8IUU.

It seems that some out there (who seem to be quick to criticize the efforts of others, or the various activities, or lack of activities of the club) have the time to make the noise but not the time to help where they can. I only ask that if you cannot volunteer to be involved directly, please try to understand what others are going through in doing some of these activities. Do not ever assume that things are always under control within any club function. If you do not like what you see or don't see happening in the club, then step forward and volunteer to help make a difference.

CANDY-BAR FUND RAISING EFFORT REPORT

Rick Wells K8SCI

I am pleased to report that as of October 2, 1987 the Club's effort thus far has raised \$1,956.00 for the club treasury. There are still a few cases of candy bars in stock at Dan KB8A's home. If you can help the fund raising effort by buying or selling any of these last remaining cases at 1/2 price (\$15.00 for a case of 30 bars), please contact: Dan KB8A or Mary Lou N8ILL as soon as possible at 267-5083.

The fund raiser for the club is now projected at \$2,185.00 (when the last bar is sold) for the club treasury (\$700.00 ahead of last year). My sincere thanks goes out to everyone who helped this long, but successful campaign. When every last candy bar is sold, a complete list of those who helped (listed in order of total monies collected) will be printed in the Communicator.

SORRY- NO MINUTES OF THE OCTOBER TRUSTEE AND GENERAL MEETINGS THIS ISSUE...

Unfortunately, the minutes of the NCARC October 1 Trustee and General meeting were not received by the Editor by this issue's deadline (October 15). Hopefully the minutes be printed in the December issue.

TECHNICAL COMMITTEE REPORT (given at the October 1 General Meeting)

Dave Kifer N8ETY

Tom N8FQQ and Rick K8SCI did the necessary work on the repeater Power Amplifier and power supply. The machine's power supply needs to be rebuilt or replaced. Dan N8ETQ is working on a Lambda Power Supply [donated by Tim NR8T in non working condition- Ed.] which will be able to handle the repeater's needs. Tom also readjusted the encoder circuit and it is now less susceptible to falsing. Tom wants to point out that the tuning capacitors are extremely touchy and were very hard to tweak (possibly due to excessive adjusting).

The Technical Committee will be having a meeting in October. If anyone is interested in attending, please listen the to the Sunday Evening net for the date and time. Dan N8ETQ will be working on the tone alert circuit for the repeater. I have found a new chip available from Radio Shack which is basically an FM receiver on a chip. I hope to build up this circuit soon and try it for our Tone Alert system.

As of this morning, I haven't spoken to Steve N08M regarding converting a Radio Shack Weathercube for the amateur frequencies.

PACKET RADIO SOFTWARE FOR RADIO SHACK COLOR COMPUTER

From Gateway, the ARRL Packet Radio Newsletter, September 25, 1987

NEW COLOR COMPUTER PACKET RADIO SOFTWARE

Monty Haley WJ5W has written two packet radio communication programs for the Radio Shack/Tandy Color Computer. COCOPACT is a packet radio terminal program that runs up to 9600 baud with split-screen display, multiple connection capabilities, on-screen status indicators, and many other features. COCO PBBS provides PBBS capabilities for the Color Computer that are comparable to the WORLI PBBS. Both programs are available from SPEC-COMM Software, P.O. Box H, Lowden, Iowa 52255. Send a business-size SASE for more information and write "PACKET" on the outside of the envelope for special documentation.

INTERESTING PC PUBLIC DOMAIN HAM RADIO SOFTWARE

Steve Stroh N8GNJ

Many of you might have read Jim Nestor N8GJR's weekly computer column in the Plain Dealer recently in which he mentioned an excellent source of public domain amateur radio software for the IBM PC and clones. That source is Public Brand Software (P.O. Box 51315, Indianapolis, Indiana 46251, 800/IBM-DISK). The amateur radio disks are HR1.2 (HAM RADIO 1), HR3.2 (HAM RADIO 3), HR4.1 (PACKET RADIO), HR6.0 (HAMRAD), AND HR7.0 (HAM RADIO 4). Each disk is \$5.00. Call them on their toll free number and request their catalog. I found utility programs in their catalog that I haven't seen anywhere else.

MOVING SALE

Two 5 foot tall 19" equipment racks. Reasonable shape. Price is right- free to first person that comes and gets them. If no one wants them, they'll be on the curb when we leave for Seattle in November. Computer desk- small put-it-together-yourself type. Ideal for Commodore-64 or Radio Shack Color Computer- best offer over \$15.00. Butternut 48TV- used, excellent condition- \$25.00. Contact Steve Stroh N8GNJ, 917 Salem Avenue, Elyria, 1-365-2793.

NORTH COAST AMATEUR RADIO EMERGENCY SERVICES AND PACKET

Steve Stroh N8GNJ

This article was a result of a conversation that I had with Rick Wells K8SCI about the lack of participation by Packet Radio equipped amateur radio operators in the October 17, 1987 simulated disaster drill. Rick's question was "Why didn't more packeteers volunteer?" This is one packeteers opinion.

1. What has the North Coast Amateur Radio Club done for packeteers, other than invite them to drag their equipment out and show it off? Not much. The Lake Erie Amateur Radio Association (LEARA), the Cuyahoga Amateur Radio Society (CARS) and Medina 2 Meters (M2M), on the other hand, sponsor and maintain packet digipeaters. Many packeteers (such as myself) belong to some or all of these clubs solely because they support packet. Hard as it may be to believe, many packeteers have never even heard of NCARC. But, they're sure aware of LEARA, CARS, and M2M. If you want to find packeteers, you'd better look to those clubs and ask for their help.

2. Packet, unlike 2m FM, requires the use of two other pieces of equipment- A TNC which is relatively small and can run off of 12 volts, and a computer or terminal, which isn't so small, and rarely can run off 12 volts. This means a portable packet station almost requires the use of a laptop (such as Tandy Model 100), or portable computer (such as a Compaq). To date, there has been very little demand for portable packet stations in this area. If there were a need, such as a bimonthly drill, then maybe some portable packet stations would be put together.

3. On the rare occasion that packet is requested, and packeteers do come out to help (such as the Simulated Shuttle Mission earlier this year), those organizing the event who request packet, don't understand it, don't use it, and for the most part completely ignore it! People, especially packeteers, tend not to respond to a second request if they are treated like that the first time (fool me once shame on you, fool me twice shame on me). If you are serious about using packet, you'd better do some reading and understand its capabilities and weaknesses. Packet is a tool, just as a 2m portable is. You don't have to be a computer nut to use packet (although admittedly that does help) and use it effectively. But, you do have to understand how it can be used.

4. There simply aren't that many packeteers out there compared to the number of 2m FM users. There are even fewer who are equipped with portable packet stations. The majority of packeteers don't monitor the local repeaters much, if at all. There is no comprehensive listing of packeteers to call out in case of an emergency. It will take time to get a "packet call up list" together, but it will be well worth it.

5. Packet isn't "the wave of the future", or a "really neat idea"- it's a valuable tool that can be used right now! If the NCARES emergency plan doesn't now include packet to handle the high volume traffic, it should. Your pleas to packeteers to get involved will carry much more weight if you can show them what their mission will be. Once you have them hooked, use them, and use them EFFECTIVELY.

To summarize then, 1) do something useful for packeteers, like putting up a digipeater. 2) Realize that there aren't many portable packet stations out there. When you find one, treat them nice, because they're rare. 3) If you do talk packeteers into coming out, you better use them effectively or they won't come back next time. 4) Get a list together of those packeteers that can help effectively. You'll have to actively search for them, but once you have a list, you should be able to field an effective packet communications system. 5) Take packet seriously! It's not a fad, or just a hobby for the computer jocks, it's a tool just like any other with its own strengths and weaknesses.

If the chips are really down, and the main communication lines are down, it's really tough to move large amounts of information via a HF voice link. It's even tougher to move it using CW. Not that those two modes can't move traffic, it's that they have a very hard time moving large amounts of traffic. Packet is ideally suited for that purpose. The packeteers in Central Ohio have convinced state officials in charge of emergency communications of that. The Ohio DSA headquarters has budgeted for a complete packet system that will be able to link into the Ohionet packet network. I won't belabor why Ohionet is such an important resource for emergency communications, but the people who've handled real disasters (such as the tank car derailment in

Dayton) know how effective packet can be and are funding construction of Ohionet links! It would be refreshing if the NCARES committee, and the Cuyahoga County Department of Emergency Assistance and Planning also understood, and funded an Ohionet node in the Cleveland area. Then you'd be talking seriously about packet. Until then, call LEARA and ask them to handle the packet duties.

If this article moved you at all, and you'd like to learn more about packet, feel free to contact Tom Kryza KB8CI at 671-7199. He'll be happy to help you get started.

MUCH MISCELLANEOUS "STUFF" FOR SALE

TI-733KSR Printing Terminal, excellent condition- \$35
 Bruel & Klaer 2604 Lab grade microphone-amplifier (4), very good condition- \$35
 Lambda rack mount power supplies: 28M 200-325 volt 100mA- \$15, 29M 100-200V 100mA- \$15
 GE ST-4 sweep generator- \$15
 Dymec 2460A, HP-2470 (4) amplifier modules, clean- \$20 each
 HP 11203A BCD-input Interface for 9812/9820 calculators
 Bogen-LSI 3RBA Pagemaster Encoder- \$10
 Tektronix plugins: CA, (4), 53/54 vertical dual trace, R xstr-risetime, 21, 22 time base, fair- \$20 each
 Tektronix 310/310A manuals- \$5 each
 Tektronix 551 dual beam scope with built-in time base and two Type L plugins- \$60
 Ampex VR-1200 manual set- \$50
 Mura-Thermy, thermometer probe for VOM's (2)- \$5 each
 Heath AA-80 10-watt mobile audio PA, mint- \$30
 Cinch #5-142 barrier strip, 8 cartons of 20 each
 UTC S-31 (2)- \$5 each
 Triad C-80U 6mH, 40A (3)- \$20 each
 Thordarson T6F50 Filament Transformer, 5V 10A 12KV insulation! (2)- \$20 each
 Miller line filter chokes D7826 5A- \$15
 D7828 20A- \$20
 Sam's Photofacts Auto Radio Series, Volumes 28 and 32- \$5 each
 DEC "Logic Handbooks" from 1966-76- various
 DEC modules: W,R,S,B,A series- various
 NIM extention cable on 1W module- \$25
 AMP Termi-point gun #69526-2 with mandrel for DEC logi-blok, with 3,000 gold clips
 TTY: 1" perf-tape, large quantity
 New parts for ASR33 maintenance- inquire
 MOS organ divider chips, 14 pin DIP, Philco pL4C07C, 7-octave (170 pieces)
 Op-amps, rare early types: DDC D-8, D-6, Philbrick/Nexus #1006, P85AH, PP65AU, Zeltec Zel-1, Analog Devices AD106
 Crystal Diodes: WE-444-A (900)
 Tubes: 1L4, 1R5, 2D21, 3AP1, 4C35/6268, 5C22, 5Y3, 6AC7, 6AF6, 6AG7, 6J5, 6J7, 6Q5G, 6SC7, 6SJ7, 6U5, 12J5, Eimac Y-152, WE 397-A, 416B, 416C, 417A-5842, 807, GL-5550, GL-5558, WL-5685-C6J, 6159W, 6360, 6883, WL-7740, 8233, 826.
 All unreasonable and innovative offers considered.
 Bob Leskovec K8DTS 216/368-4016 days
 [Whew!- Ed.]

HEATHKIT KEYSER FOR SALE

Heathkit Ultra Pro CW keyboard for sale. Less than two years old. Comes with AC adapter. Make offer. Contact Tom Rudman KD8EX at 933-8753 or on the NCARC 145.29 repeater.
